IMSWorkX Service Delivery Platform and Service Creation Environment Provide Unique Benefits to Verscom Solutions

February 19, 2013 - Rochester, NY, USA – IMSWorkX, Inc., an innovative technology company delivering leading edge Service Delivery Platforms, Service Creation Environments, and applications for telecoms and M2M applications, backed by comprehensive application hosting and support services, has been selected to replace Verscom Solutions' legacy software platforms with its XpressWorkX SIP/IMS capable Service Delivery Platforms.

Verscom Solutions will deploy IMSWorkX platforms in both its managed service applications and on-site customer deployments. These deployments include, for example, prepaid/postpaid calling-card solutions as well as VoBB (Voice over BroadBand) delivery systems. All future service enhancements will be built on the IMSWorkX platform.

In welcoming the move Shannon Chevier, IMSWorkX President & CEO, commented, "Verscom Solutions have a set of very demanding and complex network applications. Their migration to the IMSWorkX platform acknowledges the exceptional performance and capabilities of our product. Together with the expertise they have demonstrated with our XpressWorkX Service Creation Environment this will allow Verscom Solutions to provide increasingly superior applications to their clients."

The XpressWorkX Service Delivery Platform is a new approach for delivering cost-effective, feature-rich, enhanced Next Generation Network services based on a pure IP implementation. New service offerings can be quickly and reliably delivered across a wide variety of networks including IMS enabled, converged TDM/IP and VoIP networks.

The XpressWorkX Service Creation Environment is an industry-leading development environment that combines a visual call flow user interface, comprehensive Plug-in-Action Components (PACs), and support for essential Next Generation Network protocols. This provides developers with an intuitive interface that makes applications faster to develop, customize, and modify to meet changing customer and market needs.

IMSWorkX offer the fully professional product and service level that is required to sustain and grow its customers operational systems and customer base. The XpressWorkX visual Service Creation Environment is a key tool to be able to rapidly meet the demands of both existing and new customers.
