Thank You to Everyone Who Met Us at Big Communications Event

President & CEO Shannon Chevier was on hand at BCE to talk about delivering superior voice services across any network using our flagship XpressWorkX Application Server. The event also included the Women in Comms conference which was an insightful and productive afternoon spent discussing the future of technology and the progress being made for women in the industry.

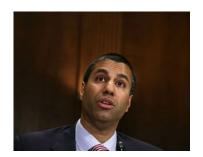

Efforts to Combat Robocalls Show Progress

The industry-led Robocall Strike Force submitted a report to the Federal Communications Commission on its findings about robocalls and efforts to stop them. "The report details a number of positive developments, among them the expedited development of industry standards for combatting such calls, the growing availability of consumer tools to block or screen unwanted calls, and increased cross-industry cooperation on the detection and blocking of illegal robocalls," said USTelecom Vice President of Law & Policy

FCC nears first vote in reversing net neutrality

Federal Communications Commission Chairman Ajit Pai's effort to repeal net neutrality rules the commission adopted during the Obama administration, is to come up for its first vote at an open meeting Thursday. If the commissioners back Pai, the issue will be opened up to input from the public. [The Hill](#)

Cybersecurity experts warn of more global attacks

The cyberattacks that began Friday had slowed by Sunday but cybersecurity experts said there was a risk that new versions of the WannaCry ransomware worm could strike soon. The attacks paralyzed more than 200,000 computers in more than 150 countries, experts said. [TechCrunch](#)
